

overview of AI Bot Arbitrage on decentralized exchanges, utilizing the BODX utility token for seamless bot usage fee payments and implementing a 25% token burning mechanism. The remaining tokens will be allocated for continuous development and improvement. The initial coin offering (ICO) will offer BODX at a rate of 0.0004 per token, with a total supply of 2,000,000,000 tokens, targeting \$400,000 to support the development of a centralized portfolio and a decentralized trading platform. The vision includes launching approximately 1000 bots based on various strategies, including centralized stablecoin bots across multiple networks to minimize losses and maximize profits.

## Introduction:

The rapidly growing cryptocurrency markets have witnessed the emergence of various trading strategies and automated solutions. Among these, AI Bot Arbitrage on decentralized exchanges has garnered significant attention due to its potential for capitalizing on price discrepancies and offering trading opportunities across multiple platforms. This whitepaper introduces the BODX utility token and its integral role in facilitating efficient bot usage and promoting ongoing development.

## The BODX Utility Token:

BODX serves as a utility token essential to the functioning of the AI Bot Arbitrage ecosystem. It acts as a seamless means for users to pay bot usage fees on the platform, ensuring smooth and efficient transactions. Additionally, BODX token holders play a vital role in determining the platform's future developments and improvements.

## Token Burning Mechanism:

In a bid to promote scarcity and value preservation, the BODX token employs a unique 25% token burning mechanism.

With every bot usage fee payment, 25% of the tokens will be permanently removed from circulation. This deflationary feature enhances the long-term prospects of the token.

## Initial Coin Offering (ICO) Details:

The ICO will initiate the distribution of BODX tokens at an introductory rate of 0.0004 per token. The total supply of BODX will be capped at 2,000,000,000 tokens. The ICO aims to raise \$400,000 to fund the development of a robust centralized portfolio and a cutting-edge decentralized trading platform.

## The Vision - Launching Diverse Bots:

The long-term vision of the project involves launching approximately 1000 bots, each adopting unique strategies based on extensive research and analysis. Centralized stablecoin bots operating across multiple networks will be prioritized to ensure minimized losses and maximized profits for traders.

## Conclusion:

AI Bot Arbitrage on decentralized exchanges, powered by the BODX utility token, opens up new possibilities for traders seeking to capitalize on cryptocurrency price disparities. The token's unique features, including its deflationary mechanism and the allocation of funds for continuous development, contribute to the platform's sustainable growth. The integration of advanced trading bots and the pursuit of listing on numerous centralized platforms further solidify the project's position as a pioneering solution in the evolving cryptocurrency landscape.
